Project 0

1. What was the hardest part of the assignment for you?

I'm not used to python's syntax for if statements and for loops, so probably that

2. What was the easiest part of the assignment for you?

Actually implementing the desired algorithms, they were all very basic

3. What problem(s) helped further your understanding of the course material?

All the problems helped me better my understanding of coding in python, but none of them taught me anything about AI.

4. Did you feel any problems were tedious and not helpful to your understanding of the material?

No.

5. What other feedback do you have about this homework?

No complaints here.
