Project 3 Answers

Self Analysis:
1. What was the hardest part of the assignment for you?
    Implementing value iteration required the most debugging on my part.
2. What was the easiest part of the assignment for you?
    Question 6 was very straightforward.
3. What problem(s) helped further your understanding of the course material?
    All the questions helped me understand the course material more, but question 4 was
    probably the most helpful in addressing things I didn't entirely understand.
4. Did you feel any problems were tedious and not helpful to your understanding of the material?
    No
5. What other feedback do you have about this homework?
    Another quick and easy homework that greatly helped me understand the material.
